Dedicated Rates

Dedicated charges are determined on a per account basis. There is a Monthly Recurring Charge (MRC) & an Installation Charge (NRC). Dedicated services must be sold on a 1 year minimum term. A \$100 voice order change charge will apply to any change order requests. A Network Interconnection Fee, determined on a case by case basis, may be applicable to off-net locations. Expedite Fees for all dedicated orders are priced on a case by case basis. All other cancellation fees prior to installation are determined on a case by case basis.

Local Loop Charges:

All local loop monthly recurring and non-recurring (installation) charges shall be on a case by case basis, based upon vendor, mileage, location, bandwidth and term.

Customer Provided Loops

	<u>NRC</u>	<u>MRC</u>
◆ DS1 Cross Connect	\$200	\$85
◆ DS3 Cross Connect	\$500	\$250

Enhanced 800 Routing Feature Definitions:

Info Digit Screening:

Block unwanted calls and control customer pay phone surcharge costs. Block calls based on the type of telephone the caller is calling from, like the pay phones or prison phones.

Info Digit Routing:

Route and control calls based on telephone line type. Route calls to customer's specific destination.

Point of Origin Blocking (3/6/10 digit blocking):

Allows or disallows calls based on the originating NPA, NPA-NXX or 10-digit number.

Point of Origination Routing (3/6/10 digit routing):

Route calls to a predetermined location based on originating NPA, NPA-XXX or 10-digit number.

Time of Day Routing:

Route calls to different locations based on the time and day of the week. Direct toll-free calls to an alternate location or department after regular business hours.

Day of Year:

Route calls to a different location based on day of year.

Percent Call Allocation:

Customer can distribute toll-free calls evenly among customer's call centers or allocate more calls to larger call centers—all with one very versatile toll-free number.
